SOVIET MATHEMATICS — DOKLADY

ANNUAL INDEX OF AUTHORS

Volume 34-35 January-December 1987 Russian Toms 289–294

Abdullaev, S. K. *Multidimensional singular integral equations in Hölder spaces with a weight* 35 113

Agayan, G. M. *On a linear programming problem with elementwise prescription of errors in the initial data* 34 454

Agranovskiĭ, M. L. *Affine invariant function algebras on the Heisenberg group* 34 53

Aĭrapetyan, R. G. *Construction of weakly commuting extensions of operators and the problem of symmetrization of hyperbolic equations* 35 439

Aĭzenberg, L. A. *Extrapolation of functions holomorphic in a product of half-planes or strips. Analytic continuation of the spectrum* 34 254

Akhatov, I. Sh., Gazizov, R. K., and Ibragimov, N. Kh. *Group classification of the equations of nonliner filtration* 35 384

Akhmedov, A. M. *On multiple expansions in the system of eigenelements and associated elements of noncompact polynomial operator pencils* 35 162

———. *On the unconditional convergence of multiple expansions in the system of eigenelements and associated elements of unbounded polynomial operator pencils* 35 330

Al′ber, Ya. I. and Notik, A. I. *On minimization of functionals and solution of variational inequalities in Banach spaces* 34 296

Aliev, F. A., Bordyug, B. A., and Larin, V. B. *The spectral method of solving matrix algebraic Riccati equations* 35 121

Allakhverdiev, B. P. *On dissipative extensions of the symmetric Schrödinger operator in Weyl's limit-circle case* 35 356

Amanov, N. T. *On approximation of continuous functions by Szász-Mirakyan operators* 35 239

Amirov, A. Kh. *On the question of solvability of inverse problems* 34 258

Andreev, V. V. See Starkov, V. V.

Androshchuk, A. A. *On uniqueness of recovery of the two-dimensional Schrödinger equation* 34 551

Apanasov, B. N. *Deformations of conformal structures on manifolds, connected with totally geodesic submanifolds* 35 242

Arabadzhyan, L. G. and Engibaryan, N. B. *On factorization of multiple Wiener-Hopf integral operators* 34 403

Artemov, S. N. *Numerically correct provability logics* 34 384

———. *Superintuitionistic logics having a provability interpretation* 34 596

Avkhadiev, F. G. *On injectivity in the domain of open isolated mappings with given boundary properties* 35 117

Babadzhanyan [Babadjanian], A. A. *Projection-related methods for solving systems of equations* 34 555

Babenko, I. K. and Bogatyĭ, S. A. *Lefschetz numbers, local indices, and periodic points* 34 492

Babenko, K. I. *On a local existence theorem in the theory of surface waves of finite amplitude* 35 647
———. *On the Tricomi problem* 34 407
———. *Some remarks on the theory of surface waves of finite amplitude* .. 35 599
Babenko, V. F. *Extremal problems in approximation theory, and inequalities for rearrangements* 34 369
Babin, A. V. *On membership of solutions of differential equations in Nikol′skiĭ spaces* 34 210
Bagirov, L. A. *Boundary value problems for a class of higher order elliptic equations in the plane, degenerate on part of the boundary* 34 260
Bakanov, G. B. See Kabanikhin, S. I.
Bakirov, N. K. *Extrema of distributions of quadratic forms in random variables and related problems of statistics* 34 496
Bakshtis [Bakštys], G. A. and Paulauskas, V. I. *On the approach of distributions of sums of independent Banach-valued random elements to infinitely divisible laws* 35 387
Baladze, È. D. *A complete solution of the Szökefalvi-Nagy problem for zonohedra* 34 458
Barsov, S. S. and Ul′yanov, V. V. *Estimates of the proximity of Gaussian measures* 34 462
Bavrin, I. I. and Yaremko, O. È. *Integral representations in Temlyakov-Weil domains* 34 215
Beklaryan, L. A. *A boundary value problem for a differential equation with deviating argument* 34 413
Belavkin, V. P. *Ordered *-semirings and generating functionals of quantum statistics* 35 246
Belolipetskiĭ, A. A. and Ryabov, A. Yu. *On singularities of the Bellman function in a linear time-optimal problem* 34 500
Belov, Yu. A. and Kas′yanyuk, V. S. *On an optimal estimate of a linear functional from the values of n other linear functionals in Hilbert space* 34 173
Belyaev, Yu. K. *Asymptotic properties of multiplicative estimators in accumulating data* 35 471
Benyash-Krivets, V. V. See Platonov, V. P.
Berezanskiĭ, L. M., Malygina, V. V., and Sokolov, V. A. *Criteria for exponential stability of solutions of equations with bounded aftereffect* 34 1
Bitsadze, A. V. *On polyharmonic functions* 35 540
———. *The multidimensional Hilbert transform* 35 390
Bloshanskiĭ, I. L. *On some questions of square convergence of multiple Fourier series and integrals of functions in L_1* 35 475
Bobylëv, N. A. *On a characteristic of extremals of variational problems* 35 59
Bogatova, V. P. and Glushko, V. P. *Solvability of initial-boundary value problems for higher order parabolic equations with degeneracy in the space variable* 34 503
Bogatyĭ, S. A. See Babenko, I. K.
Bogomolov, A. M. and Sytnik, A. A. *Universal finite automata* 35 545
Boltyanskiĭ, V. G. *The tent method in topological vector spaces* 34 176
Bordyug, B. A. See Aliev, F. A.
Borisenko, A. A. *On extremal properties of compact surfaces of nonpositive extrinsic curvature* 35 508
Borisenko, A. A. and Yampol′skiĭ, A. L. *On the Sasaki metric of the tangent and normal bundle* 35 479

Bronshteĭn, M. D. *Division theorems in spaces of functions of finite smoothness and in Gevrey spaces* 34 180
Budaev, V. D. *On the convergence of spectral expansions at a point of discontinuity of the coefficients of a linear nonselfadjoint second order differential operator* 35 279
———. *On the unconditional basis property of systems of eigenfunctions and associated functions of a second order operator with discontinuous coefficients* 34 141
Bugrov, Ya. S. *Imbedding theorems and convergence of multiple Fourier series* 35 274
Bulinskiĭ, A. V. *An estimate of the rate of convergence in the central limit theorem for random fields* 34 416
Burenkov, V. I. and Gusakov, V. A. *On precise constants in Sobolev imbedding theorems* 35 651
Burenkov, V. I. and Maman, K. R. *Local and global estimates of the derivatives of solutions of inhomogeneous hypoelliptic equations* 35 570
Busha, Ya. [J. Buša], *On singular numbers of perturbed matrices* 34 265
Chebotarev, A. M. See Maslov, V. P.
Cherednik, I. V. *On irreducible representations of elliptic quantum R-algebras* 34 446
Cherkasov, I. D. *Transformation of one-dimensional diffusion fields in the plane* 35 56
Chin′ Ngoc Min′ [Chinh Ngoc Minh], See Deundyak, V. M.
Chistov, A. L. *Efficient factorization of polynomials over local fields* 35 430
Chistyakov, V. M. *On smoothness of the solutions of parabolic systems* 34 593
Chubarikov, V. N. *A multidimensional additive problem with prime numbers* 34 365
Degterev, I. A. See Manturov, O. V.
Degtyarev, L. M., Drozdov, V. V., and Poshekhonov, Yu. Yu. *On a method of numerical solution of the first boundary-value problem for three-dimensional elliptic equations* 34 562
Dektyarev, I. M. *A remark on the structure of the set of deficient divisors.* 35 138
Derkach, V. A. and Malamud, M. M. *On the Weyl function and Hermitian operators with gaps* 35 393
Deundyak, V. M., Simonenko, I. B., and Chin′ Ngoc Min′ [Chinh Ngoc Minh], *Homotopy classification of families of one-dimensional singular operators with piecewise continuous coefficients* 34 100
Dolbilin, N. P., Shtan′ko, M. A., and Shtogrin, M. I. *Cubic subcomplexes in regular lattices* 34 467
Domanskiĭ, E. N. and Fonf, V. P. *Operator bases and solvability of operator equations of the first kind* 35 70
Donchev, A. L. See Vel′ov, V. M.
Drozdov, V. V. See Degtyarev, L. M.
Dubinskiĭ, Yu. A. *The Cauchy problem for pseudodifferential equations with variable analytic symbols* 34 14
D′yakonov, E. G. *On iterative methods with saddle operators* 35 166
Dzhuraev, A. *On two-dimensional singular integral equations degenerate along a line* 34 319
Dzhuraev, A. D. *On the theory of boundary value problems for elliptic systems of equations in a bounded three-dimensional domain* 34 104
———. See Maksudov, F.G.

Èfendiev, M. A. *On a property of the conjugate integral, and a nonlinear Hilbert problem* 35 535
Efremovich, V. A. See Galiulin, R. V.
Egorov, I. E. *Solvability of a boundary value problem for a higher order equation of mixed type* 35 364
Egorov, Yu. V. *On removable singularities in the boundary conditions for solutions of linear differential equations* 34 18
Ëitysheva, N. A. *On the question of stability of steady-state solutions of some hyperbolic systems* 34 21
Èminyan, O. M. *Boundary uniqueness theorems for analytic functions of several complex variables* 35 595
Engibaryan, N. B. See Arabadzhyan, L. G.
Epifanov, O. V. *A differential operator of infinite order with constant coefficients on a weighted space of entire functions* 34 24
Evtushenko, Yu. G. and Potapov, M. A. *Methods of numerical solution of multicriterion problems* 34 420
Filippova, T. F. See Kurzhanskiĭ, A. B.
Fomenko, A. T. and Tsishang, Kh. [H. Zieschang], *On the topology of the three-dimensional manifolds arising in Hamiltonian mechanics* 35 529
Fonf, V. P. See Domanskiĭ, E. N.
Gabasov, R., Kalinin, A. I., and Kirillova, F. M. *An algorithm for optimizing a quasiliner control system* 35 250
Gadzhiev, F. A. *On functions of four variables on the three-dimensional sphere that are not representable in the form of a composition of functions of fewer variables* 34 150
Galiulin, R. V. and Efremovich, V. A. *The Cartesian characteristic in Morse theory* 35 487
Gal′perin, G. A. *Solution of Proizvolov's problem on covering a multidimensional polyhedron by pyramids, and its generalizations* 35 293
Gasymov, M. G. and Pashaev, R. T. *A linear-fractional pencil of differential operators of Sturm-Liouville type* 35 608
Gavrilov, V. I., Kanatnikov, A. N., Kravtsev, S. V., and Simushev, A. A. *Maximality theorems for spatial mappings and some applications* 34 145
Gavrilov, V. V. *On continuous analogues of inequalities of Bessel and Hausdorff-Young type for the one-dimensional Schrödinger operator with an arbitrary spectrum* 35 134
Gazizov, R. K. See Akhatov, I. Sh.
Gel′fand, I. M. See Vasil′ev, V. A.
Gel′fand, I. M. and Goncharov, A. B. *On a characterization of Grassmann manifolds* 34 189
———. *Recovery of a compactly supported function starting from its integrals over lines intersecting a given set of points in space* 34 373
Gel′fand, I. M. and Graev, M. I. *A duality theorem for general hypergeometric functions* 34 9
———. *Hypergeometric functions associated with the Grassmannian* $G_{3,6}$. 35 298
Gel′fand, I. M., Lidskiĭ, B. V., and Ponomarev, V. A. *Preprojective reduction of the free modular lattice* D^r 35 334
Gel′fand, I. M. and Serganova, V. V. *On the general definition of a matroid and a greedoid* 35 6
———. *Strata of a maximal torus in a compact homogeneous space* 35 63
Ginzburg, V. A. *Proof of the Deligne-Langlands conjecture* 35 304

Glizer, V. Ya. *An iterative method for the approximate solution of some singularly perturbed equations* 34 219
Glushko, V. P. See Bogatova, V. P.
Gol′berg, A. I. and Gurvich, V. A. On the maximum number of edges for a graph with n vertices in which every subgraph with k vertices has at most l edges 35 255
Gol′berg, A. I., Gurvich, V. A., and Men′shikov, I. S. *The existence of non-trivial stable social choice functions* 34 154
Gol′dsheĭd, I. Ya. and Margulis, G. A. *A condition for simplicity of the spectrum of Lyapunov exponents* 35 309
Golichev, I. I. *Solution of some optimal control problems by the iteration method* 35 360
Golitsyna, A. G. and Molchanov, S. A. *A multidimensional model of sparse random scatterers* 35 661
Gomilko, A. M. and Meleshko, V. V. *The Dirichlet problem for the biharmonic equation in a half-strip* 35 612
Goncharov, A. B. See Gel′fand, I. M.
Gorbachuk, V. I. *On summability of expansions in eigenfunctions of selfadjoint operators* 35 11
Gordeev, N. L. *Complexity of algebras of invariants of finite groups* 35 67
Graev, M. I. See Gel′fand, I. M.
Grigor′yan, A. A. *A criterion for the existence on a Riemannian manifold of a nontrivial bounded harmonic function with finite Dirichlet integral* 35 339
———. *On stochastically complete manifolds* 34 310
Grishkov, A. N. *On the genetic property of Bernstein algebras* 35 489
Grunskiĭ, I. S. *On the indistinguishability of finite automata by multiple experiments* 34 306
Gurvich, V. A. See Gol′berg, A. I.
———. See Obraztsov, I. F.
Gusakov, V. A. See Burenkov, V. I.
Guseĭnov, E. G. *Inequalities for singular integrals in the spaces of L. D. Kudryavtsev* 35 575
Guseĭnov, G. Sh. See Maksudov, F. G.
Gusevskiĭ, N. A. and Kapovich, M. È. *Conformal structures on three-dimensional manifolds* 34 314
Gvishiani, A. D. See Obraztsov, I. F.
Ibragimov, N. Kh. See Akhatov, I. Sh.
Il′in, V. A. *An inequality of Hilbert type with respect to a system of eigenfunctions of the Laplace operator for a radial function different from zero in a ball of sufficiently small radius* 34 599
Il′in, V. A. and Ĭo, I. [Istvan Joó], *Inequalities of Bessel and Hausdorff-Young-Riesz type for functions in the class of radial functions, with respect to a system of eigenfunctions of the Laplace operator* 34 474
Il′in, V. A. and Moiseev, E. I. *A nonlocal boundary value problem for the Sturm-Liouville operator in the differential and difference treatments* ... 34 507
Il′yasov, N. A. *On theorems for imbedding generalized Hölder spaces in L_p* 34 194
Imanaliev, M. I. and Pankov, P. S. *The phenomenon of a rotating boundary layer in the theory of singularly perturbed systems of ordinary differential equations* 34 117
Ĭo, I. [Istvan Joó], See Il′in, V. A.

Isaev, G. A. and Kuliev, T. Yu. *Analytic properties of the boundary of the numerical range of operators in Hilbert space* 34 569
Islomov, B. See Salakhitdinov, M. S.
Ismoilov, D. *On an asymptotic formula in additive number theory*..... 34 424
Ivanov, A. A., Tsaranov, S. V., and Shpektorov, S. V. *Maximal subgroups of the O'Nan-Sims sporadic simple group and its automorphism group*..... 34 534
Ivanov, V. I. *Representation of functions by series in metric symmetric spaces without linear functionals* 34 113
Izhboldin, O. T. *On the torsion subgroup of Milnor's K-groups*..... 35 493
Kabanikhin, S. I. *Regularization of multidimensional inverse problems for hyperbolic equations on the basis of the projection method*..... 35 73
Kabanikhin, S. I. and Bakanov, G. B. *On the stability of a finite-difference analogue of a two-dimensional problem of integral geometry*..... 35 16
Kalinin, A. I. See Gabasov, R.
Kalyabin, G. A. *On moduli of smoothness of functions given on the sphere* 35 619
Kanatnikov, A. N. See Gavrilov, V. I.
Kandelaki, N. P. See Vakhania, N. N.
Kanovich, M. I. *Quasipolynomial algorithms for recognizing the satisfiability and derivability of propositional formulas*..... 34 273
Kapovich, M. È. *Some properties of developments of conformal structures on three-dimensional manifolds* 35 146
———. See Gusevskiĭ, N. A.
Kapustin, N. Yu. *On the existence and uniqueness of an L_2-solution of Tricomi's problem for a parabolic-hyperbolic equation*..... 34 478
———. *On two problems for a hyperbolic equation in a characteristic triangle*..... 35 314
Karapetyants, N. K. *On an analogue of Hörmander's theorem for domains different from R^n* 35 444
Kas'yanyuk, V. S. See Belov, Yu. A.
Katsylo, P. I. *The moduli variety of curves of genus 4 is rational*..... 34 388
Kerimov, N. B. *Some properties of the eigenfunctions and associated functions of ordinary differential operators*..... 34 573
Khaĭdarov, A. *On estimates and the existence of solutions of a class of inverse problems for elliptic equations* 35 505
Khanin, L. G. *A theorem on spectral synthesis of ideals for a class of Banach algebras*..... 35 108
Khapaev, M. M. and Mal'kov, K. V. *On the asymptotic behavior of the solutions of differential equations with perturbations*..... 34 360
Khenkin, G. M. See Novikov, R. G.
Khisamutdinov, A. I. *On a simulation method of statistical modeling of rarefied gases*..... 34 607
Khmaladze, È. V. *Renewal fields and the problem of testing simple statistical hypotheses in R^m* 34 293
———. See Nikabadze, A.M.
Khrennikov, A. Yu. See Smolyanov, O. G.
Kirillova, F. M. See Gabasov, R.
Kiseleva, L. V. *On the number of zeros of the Riemann zeta-function in short intervals of the critical line*..... 35 342
Kislyakov, S. V. *Interpolatory inequalities for Fourier multipliers, and their applications* 35 20

Klibanov, M. V. *On the determination of a function of compact support from the argument of its Fourier transform* 34 121
Kolyada, V. I. *Estimates of maximal functions connected with local smoothness* 35 345
Kondrashov, V. E. *Extracting the roots of a polynomial in the order of increase of their moduli* 35 77
Konovalov, V. N. *Criteria for extension of the Sobolev spaces* $w_\infty^{(r)}(\Omega)$ *for bounded plane domains* 34 27
Korenevskiĭ, D. G. *A matrix criterion and matrix sufficient conditions for asymptotic stability and boundedness with probability one of solutions of linear stochastic difference equations* 34 390
———. *Coefficient criteria and sufficient conditions for asymptotic stability with probability one of linear systems of Itô stochastic differential equations* 34 377
Kostikov, Yu. A. See Vinokurov, V. A.
Kravtsev, S. V. See Gavrilov, V. I.
Krushkal′, S. L. *A new approach to variational problems in the theory of quasiconformal mappings* 35 219
Kryanev, A. V. *A statistical form of the regularized least squares method of A. N. Tikhonov* 34 538
Kubyshkin, E. P. *Parametric excitation of spatially inhomogeneous waves in distributed kinetic systems* 34 62
Kucherenko, V. V. and Osipov, Yu. V. *Asymptotic solutions of equations with a regular singular point* 35 402
Kudaĭbergenov, K. Zh. *On questions of Keisler and Morley* 34 482
Kukushkin, N. S. *Stability of the N-nucleolus in games with structured payoff functions* 34 381
Kuliev, T. Yu. See Isaev, G. A.
Kurzhanskiĭ, A. B. and Filippova, T. F. *On a description of the set of viable trajectories of a differential inclusion* 34 30
Kusraev, A. G. *On analytic representation of majorized operators* 35 623
———. *On integral representation of majorized operators in spaces of measurable vector-valued functions* 35 367
Kusraev, A. G. and Strizhevskiĭ, V. Z. *On majorization of linear operators* 35 171
Kuznetsov, Yu. V. *On classes of Boolean functions which are invariant with respect to identification of variables* 34 339
Ladyzhenskaya, O. A. *Minimal global B-attractors of semigroups and initial-boundary value problems for nonlinear partial differential equations* 35 496
Laptev, G. I. *Quasilinear parabolic equations of second order with integral coefficients* 35 318
Larin, A. A. *On spectral expansions corresponding to selfadjoint extensions of some singular elliptic operators* 35 322
Larin, V. B. See Aliev, F. A.
Lazarev, M. I. *Potentials of linear operators and reduction of boundary value problems to the boundary* 35 175
Levendorskiĭ, S. Z. *On generalizations of the Weyl formula for degenerate operators* 35 448
Levichev, A. V. *Prescribing the conformal geometry of a Lorentz manifold by means of its causal structure* 35 452
Levin, V. L. *Measurable selections of multivalued mappings and the mass transfer problem* 35 178

Lidskiĭ, B. V. See Gel′fand, I. M.
Lipanov, A. M. *On a problem-oriented program complex for investigating processes in gas generators* 35 261
Lipkin, L. I. *Correct models in recognition problems with random information* 34 159
Liskovets, O. A. *Discrete regularization of problems with arbitrarily perturbed monotone operators* 34 198
Litvinchev, I. S. *A decomposition for nonseparable extremal problems* 35 25
Lizorkin, P. I. See Nikol′skiĭ, S. M.
Logofet, D. O. *On the hierarchy of subsets of stable matrices* 34 247
Lokutsievskiĭ, O. V. See Lokutsievskiĭ, V. O.
Lokutsievskiĭ, V. O. and Lokutsievskiĭ, O. V. *On numerical solution of boundary value problems for equations of parabolic type* 34 512
Lyashenko, N. N. *Arithmetic modeling of the Wiener process, and the Möbius function* 34 345
Lyashko, S. I. and Red′ko, S. E. *Approximate solution of the equation of the dynamics of a viscous stratified fluid* 34 251
Lyubich, M. Yu. *Measurable dynamics of the exponential* 35 223
Lyubishkin, V. A. See Sadovnichiĭ, V. A.
Makarov, N. G. *Boundary distortion under conformal mappings, and Hausdorff dimension* 35 227
Maksudov, F. G. and Èfendiev, M. A. *A nonlinear Hilbert problem for a doubly connected domain* 34 349
Maksudov, F. G. and Guseĭnov, G. Sh. *On solution of the inverse scattering problem for a quadratic pencil of one-dimensional Schrödinger operators on the whole axis* 34 34
Malamud, M. M. See Derkach, V. A.
Mal′kov, K. V. See Khapaev, M. M.
Malygina, V. V. See Berezanskiĭ, L. M.
Maman, K. R. See Burenkov, V. I.
Manturov, O. V. and Degterev, I. A. *Invariant ternary algebras on simple Lie algebras* 35 150
Marchuk, N. G. *A mixed problem for the vector wave equation* 35 230
Margulis, G. A. See Gol′dsheĭd, I. Ya.
Martinovich, M. See Sadovnichiĭ, V. A.
Martirosyan, V. A. *On entire functions bounded on a closed angle and representable by power series with gaps or with real coefficients* 34 224
Maslov, V. P. *A new approach to generalized solutions of nonlinear systems* 35 29
Maslov, V. P. and Chebotarev, A. M. *Displacement of the boundary conditions and uniqueness theorems for nonlinear boundary value problems* . 34 39
Maz′ya, V. G. and Slutskiĭ, A. S. *Averaging of differential equations on a fine mesh* 35 371
Meleshko, V. V. See Gomilko, A. M.
Men′shikov, I. S. See Gol′berg, A. I.
Meshkov, V. Z. *Decrease of the solutions of some hypoelliptic equations and Kato's theorem* 34 44
Mikesh, Ĭ. *On Sasaki spaces and equidistant Kähler spaces* 34 428
Mikhalev, A. V. *Orthogonally complete many-sorted algebraic systems* 34 227
Moiseev, E. I. See Il′in, V. A.
Molchanov, S. A. See Golitsyna, A. G.
Molchanov, V. F. *Plancherel's formula for pseudo-Riemannian symmetric spaces of rank* 1 ..... 34 323

Monakhov, V. N. and Semenko, E. V. *Boundary value problems with infinite index in Hardy spaces* 34 517
Morozov, V. A. and Nazimov, A. B. *On the problem of regularizing systems of linear algebraic equations* 34 278
Muraveĭ, L. A. *Asymptotic behavior of a solution of the wave equation in a resonator* 34 49
Murskiĭ, V. L. *On the fraction of closed classes without a finite basis of identities* 35 407
Musaev, B. I. *On the approximate solution of singular integral equations with negative index by the Bubnov-Galerkin method and the collocation method* 35 411
Nagnibida, N. I. *On integral perturbations of the operator of multiplication by the independent variable* 35 82
Nasibov, F. G. *On extremal problems in the class B_σ* 35 512
Nasyrov, R. M. and Nasyrov, S. R. *Convergence of an approximate method of S. A. Khristianovich for solving the Dirichlet problem for an elliptic equation* 34 484
Nasyrov, S. R. See Nasyrov, R. M.
Nazimov, A. B. See Morozov, V. A.
Neretin, Yu. A. *Almost invariant structures and constructions of unitary representations of the group of diffeomorphisms of the circle* 35 500
———. *On spinor representation of* $O(\infty, C)$ 34 71
Netrebin, A. G. and Shashkin, Yu. A. *Separation by a fixed system of sets.* 35 85
Nguen Dong An′ [Nguyen Dong Anh], *Random oscillations in a van der Pol system subjected to periodic and random excitations* 34 67
Nigmatullin, R. G. *Two classes of proofs of lower bounds of complexity* 35 516
Nikabadze, A. M. and Khmaladze, È. V. *On goodness-of-fit tests for parametric hypotheses in R^m* 35 627
Nikiforov, A. F., Suslov, S. K., and Uvarov, V. B. *Classical orthogonal polynomials in a discrete variable on nonuniform lattices* 34 576
Nikol′skiĭ, S. M. and Lizorkin, P. I. *Approximation of functions by spherical polynomials in the L_p-metric* 34 75
———. *Inequalities for harmonic, spherical, and algebraic polynomials* 34 124
Nikol′skiĭ, Yu. S. *On imbedding theorems for weighted anisotropic spaces of differentiable functions* 34 489
Norvidas, S. T. *On stability of differential operators in spaces of entire functions* 34 521
Notik, A. I. See Al′ber, Ya. I.
